Connect the Dots Across Every Conversation: Introducing Hedy Topics

Topics transforms Hedy from a powerful meeting assistant into a comprehensive knowledge management system. By grouping related sessions together, you can finally see the bigger picture across all your important conversations.

Your most important conversations don't happen in isolation. That breakthrough client meeting builds on last month's discovery call. Today's lecture connects to concepts from three weeks ago. Your medical appointment makes more sense when viewed alongside your entire health journey.

But until now, managing these conversation threads meant mentally juggling context across dozens of separate sessions, hoping you'd remember the crucial details that tie everything together.

Hedy Topics changes that completely.

Your Conversations, Connected

Topics transforms Hedy from a powerful meeting assistant into a comprehensive knowledge management system. By grouping related sessions together, you can finally see the bigger picture across all your important conversations.

Whether you're tracking client relationships, following educational courses, managing health discussions, or developing complex projects, Topics ensures no insight gets lost and every conversation builds meaningfully on what came before.

Intelligence That Spans Sessions

AI-Generated Topic Overviews

Every Topic automatically generates a comprehensive summary that highlights key themes, decisions, and action items from all related sessions. See how discussions have evolved, track decision patterns, and identify emerging trends across your entire conversation history.

Topic Chat: Ask Questions Across Time

The revolutionary Topic Chat feature lets you ask questions that draw insights from multiple sessions simultaneously. Instead of searching through individual meetings, simply ask Hedy about patterns, decisions, or developments, and get answers that incorporate context from every relevant conversation.

"What concerns has this client raised over our past three meetings?" "How has my understanding of this medical condition evolved since my first appointment?" "What themes keep coming up in our team's strategy discussions?"

Hedy cites specific sessions when providing answers, so you always know where insights originated and can dive deeper when needed.

Perfect for Every Professional Context

Client & Project Management

Group all interactions with specific clients to maintain perfect continuity. Prepare for meetings by understanding the complete relationship history, track project evolution, and ensure every conversation builds strategically on previous discussions.

Coaching & Mentoring

Transform one-off coaching sessions into comprehensive development journeys. Track your mentee's growth over time, identify recurring themes and breakthrough moments, and prepare for each session with complete context from previous conversations. Whether you're a professional coach, manager developing team members, or mentor guiding career growth, Topics ensures every conversation builds meaningfully on the last.

Health & Medical Care

Connect appointments with specialists, track treatment discussions, and maintain comprehensive health records. Ask questions that draw from your entire medical journey to prepare better questions and make more informed decisions.

Learning & Education

Organize course lectures, training sessions, and educational content. See how your understanding has developed over time and review comprehensive knowledge across multiple learning sessions.

Team Development

Track coaching conversations, performance discussions, and team development over time. Identify growth patterns, recurring challenges, and successful strategies across multiple interactions.

Visual Organization That Makes Sense

Customize your Topics with colors and emojis for instant recognition. Ø=Þ€ for startup projects, Ø<ßå for healthcare meetings, Ø=ÜÊ for analytics reviews—make your organization system as intuitive as you want.

Create new Topics on-the-fly without interrupting your workflow. Spotted a new project theme during a meeting? Add it instantly and keep the conversation flowing.

Seamless Integration with Your Workflow

Topics works exactly how you'd expect:

- Assign During Sessions : Add conversations to Topics as they happen
- Organize Retrospectively : Sort past sessions into relevant Topics anytime
- Cross-Device Sync : Access your organized conversations on any device
- Export Everything : Full compatibility with your existing tools via API and Zapier

The Power of Connected Intelligence

Topics represents something bigger than organization—it's about transforming scattered conversations into connected intelligence. When you can see patterns across multiple sessions, ask questions that span months of discussions, and prepare for meetings with complete context, you don't just become more organized.

You become the person who truly understands the bigger picture.

Get Started with Topics Today

Topics is available as part of Hedy Pro, reflecting the advanced AI processing required to connect and analyze conversations across multiple sessions.

Ready to transform how you manage your most important conversations? Update to the latest version of Hedy and start organizing your sessions into Topics. Your future self will thank you for the clarity.
