Hedy app shown on a phone and desktop browser with meeting coaching suggestions

We're thrilled to announce a game-changing update to Hedy, your trusted AI-powered meeting assistant. With the release of version 1.4, we're introducing Hedy Cloud Sync - a feature that brings the power of Hedy to your desktop browser, creating a seamless dual-device experience that will revolutionize your virtual meetings.

What is Hedy Cloud Sync?

Hedy Cloud Sync allows you to access Hedy's chat interface and session history directly from your desktop browser. This new feature complements the mobile app, enabling you to run Hedy on your phone for audio capture while interacting with its insights on your larger computer screen.

Key Benefits of Cloud Sync

1. Dual-Device Synergy : Experience the best of both worlds by running Hedy on your phone to capture audio, while accessing chat and insights on your larger desktop screen. This synergy allows for a more

comprehensive and user-friendly meeting experience.

2. **Enhanced Readability** : Say goodbye to squinting at your phone during crucial moments. With Hedy's web interface, you can enjoy all of Hedy's valuable insights on your computer's larger display, making it easier to read and interact during fast-paced discussions.

3. **Seamless Multitasking** : Effortlessly switch between your meeting window and Hedy's chat interface on your desktop. This seamless integration maximizes your productivity and engagement, allowing you to stay focused on the meeting while having Hedy's assistance just a glance away.

4. **Access Session History** : Need to review a past meeting? No problem. With Hedy Cloud Sync, you can easily access and review past sessions and insights directly from your browser. This feature is perfect for follow-ups, report writing, or preparing for related meetings.

5. **Cross-Platform Compatibility** : Whether you're team Windows, Mac, or Linux, we've got you covered. Hedy's web app works on any desktop operating system with a modern browser, ensuring that you can access Hedy's insights no matter what computer you're using.

How to Get Started with Hedy Cloud Sync

Getting started with this exciting new feature is quick and easy:

1. Update Hedy to version 1.4 in the App Store.
2. Open the Hedy app and enable Cloud Sync when prompted.
3. Continue running Hedy on your mobile device as usual during meetings.
4. Visit app.hedy.bot (<https://app.hedy.bot>) in your desktop browser.
5. Log in with your existing Hedy account.
6. Start accessing Hedy's chat interface and session history on your computer while Hedy listens through your phone.

The Future of AI-Assisted Meetings

At Hedy, we're constantly pushing the boundaries of what's possible in AI-assisted meetings. The new Cloud Sync feature is designed to complement your mobile Hedy experience, giving you the best of both worlds - Hedy's powerful listening capabilities on your phone and a comfortable chat interface on your larger screen.

This dual-device approach opens up new possibilities for how you interact with Hedy during your meetings. Imagine having Hedy's real-time insights readily available on your second monitor while you're presenting, or easily referencing past meeting notes without interrupting your current session.

We Value Your Feedback

As always, we're eager to hear from our users. How is the new Cloud Sync feature enhancing your virtual meetings? Do you have ideas for new features you'd like to see in Hedy? We encourage you to share your thoughts and suggestions on our feature board (<https://hedy.canny.io/>) .

Your feedback is invaluable in helping us continually improve Hedy and ensure it remains the brightest AI meeting assistant (</post/top-5-ai-meeting-assistants/>) in the room.

Stay Bright with Hedy

Thank you for being a part of the Hedy community. We're excited to see how this new dual-device experience enhances your virtual meetings and helps you shine even brighter in your professional interactions.

Don't forget to update your Hedy app to version 1.4 from the App Store to access this exciting new feature!
